

## **Discrepant Event**

**Have you ever seen a demonstration and said AHFFF HAAA?? That is the beginning of a discrepant event. While you are here you will be responsible for working with a partner or small group to present a discrepant event to the whole group. It should include at least one process skill and some type of hands on activity. You can focus on any content area (earth, life, chemistry or physical science), talk to the instructors, or look through some of the great books ASC owns to get some ideas. It should take no longer than 15 minutes to do your demonstration and have the class participate too.**

**Add your names to the sign up sheet so we know when you are going to present during the next two weeks.**

**Please use the Discrepant Event form to let us know what you did.**

Names \_\_\_\_\_

## ***Discrepant Event***

Title \_\_\_\_\_

**Write up your discrepant event (illustrations are good too). Cite your source too....have to give credit where it is due!**
