SUBJ: Barrow File - Library Accessions

Because of the numerous requests for some sort of listing of work done on the North Slope of Alaska and more particularly by NARL Investigators, we are attempting the memo-graph publication of the titles in our NARL "$\text{Barrow File}"$. Since we are interested in all publications we decided to include those titles we have learned of through other bibliographies even though we do not have copies in our files. In this regard we erred in calling this mimeo publication an accessions list. Those titles not in the NARL collection are marked with an asterisk. The first asterisk and its explanation appear on page 6.

We consider this mimeographed production a rough draft and we invite all investigators and other interested parties to send in additions, deletions, and corrections. We hope this effort will be a first step contribution to a comprehensive listing of NARL work and other associated investigations.

Sincerely,

Max C. Brewer
Director
